

Dashboard Presentation

Presented By: Chandrani Das

Tool Used: Power BI

Brief:

Objective:

1. Developed an interactive dashboard using transaction and customer data from csv files to provide real-time insights.
2. Shared actionable insights based on dashboard findings to support decision- making processes.
3. Data Source: Kaggle.

- Design an interactive '**Credit Card Financial Dashboard**' using the transaction and customer data.
- **Weekly Dashboard** that provides **real time insights** into key performance metrics and trends, enabling stakeholders to monitor and analyze Credit Card Operations effectively.

Situation

- Overview of the Report:
- Overall Revenue = **57M.**
- Total Interest = **8M.**
- Total Transaction amount = **46M.**
- Male Customers are contributing more to revenue = **31M**; Female = **26M.**
- Blue & Silver credit card are contributing to **93%** of overall transactions.
- Texas, New York and California is contributing to **68%.**
- Overall Activation rate = **57.5%**

Results

Task

Data Extraction.
Data Cleaning.

Data Processing
and Power
Query.

Action

Import the data
to Power BI.
Data Analysis.

Dashboards and
Insights.
Export and
Share.

Questions?

Why I opted for a
'Financial dataset'?

How my current report
aligns with the baseline
reporting expectations?

What are your reporting
expectations? How close it
aligns with my work?

Thank You.
